About SNF

While social media was constantly being used to spread social unrest, Conflict and hatred Mr. Pramod Gopalrao Gaikwad from Nashik city of Maharashtra state thought to use it for rural development. As a result, the **“Social Networking for Social Cause”** campaign started in 2010, and is now the biggest **“Social Start Up”** for betterment of the underprivileged society. This first of its kind, unique campaign in India, later took on an institutional form called the **“Social Networking Forum” (SNF)** and is currently contributing for the development of tribal & rural population. Till date, SNF has brought joy to more than **85,000 deprived people** by **finding solutions over hundreds of issues** in the areas of **health, education and water** along with social networkers across the globe.

Motto : Social Networking for Social Cause

Objectives –

- To make use of social media for rural & tribal upliftment.
- To reduce economic and social inequality in rural and urban population.
- To find solutions over issues in the areas of water, health & education
- To create a responsible next generation & inculcate social responsibilities in youngsters in right age.

Achievement of SNF

SNF Achievements	More than 500 projects & 85000 beneficiaries
Ongoing Projects	Achievements
Health, Education & Water	Thousands of members across the globe joined the Movement
➤ Providing drinking water to villages	SNF has achieved in making 22 villages self-sufficient for water. Another 25 villages will have water soon.
➤ Employment creation for women and farmers	Skill development programs and organic vegetable festivals are arranged benefiting hundreds of people in rural areas
➤ Job Guidance Centre for Youth	Assistance is being provided for getting government and private sector jobs for youth by starting study centre in tribal areas
➤ Computer Literacy Campaign	More than 5000 students have been made computer literate.
➤ Martyrs' Fund	We have provided financial aid for the education of the children of martyrs who have sacrificed their lives for our country.
➤ Sports Development Scheme	With the help of the Forum, youngsters are achieving success in national as well as international sports competitions.
➤ Eradication of Malnutrition	Hundreds of children have been treated & cured of malnutrition.
➤ Environmental Conservation	Thousands of trees are being conserved

- Niti Aayog : MH/2018/0187528

I came across social media at a time when social networking was becoming more of a means for spreading hatred than for cultivating a sense of friendship. It was very sad to see this medium being used for ethnic, religious and political agenda and to see the young generation of the country being swept away in this wave. Given this, the idea of using social media for social work came to my mind after realizing that we should find an alternative to problems instead of merely complaining. The embodiment of this idea is the Social Networking Forum. Today, It is gratifying to note that the Social Networking Forum, a small campaign launched ten years ago with the aim of making positive use of social media, has expanded to become a ray of hope in the lives of thousands of underprivileged people. This people's movement successfully carried out literally hundreds of initiatives to address the issues of health, education and water for the upliftment of the rural-tribal people.

Having studied in a small village and later settled in Nashik city of Maharashtra state, I was always disturbed by the difference between rural poverty and urban prosperity. So the main goal of the Social Networking Forum was set to eradicate economic and social inequality in these two areas. Moving towards this aim, efforts were made to keep in touch with the rural-tribal people, to know their problems, to think about how to overcome them & to get public participation by presenting problems and solutions on social media. On the other hand, an attempt was made to form a chain of like-minded people across the globe. The combined effect of all this was that basic facilities like water, education and health began to reach the lower stratas of the country. Completed activities were shared on social media to let people know how their help was used. The remarkable result of this transparency was that from the absolute satisfaction and pure joy that the participating members received, they were permanently connected to the forum's activities.

Although it was a pleasure for me to see the small movement in 2010 being transformed into a big chain of social activities, the journey of ten years was not so easy. Despite the great support from the people, there was some criticism too. Some felt that these social activities were publicity stunts, some felt that they were of no use, while others ignored the cause. However, there was a large section on social media who spontaneously supported for the cause. Therefore, ignoring negativity, our work has been going on continuously with popular support. Of course, all the credit for this success goes to like-minded collaborators from India and abroad who have participated in our activities wholeheartedly. In addition, journalists from the electronic and print media have been instrumental in bringing SNF's work to the forefront and increasing public participation. Today, looking back on completion of 10 years of this social journey, we, the members of the Social Networking Forum, are deeply satisfied that thousands of the unprivileged people have been able to find happiness.

I am grateful to all those who are supporting SNF for this movement of rural development.

- Pramod Gopalrao Gaikwad

Founder, Social Networking Forum
socialforum10@gmail.com

SNF - Area of work

➤ Tribal & rural upliftment: To increase employment opportunities for tribal & rural people & to reduce the economic & social inequality between rural and urban population.

- Competitive exams Guidance centers for youngsters
- Higher Education Assistance for students
- Skill Development for women.
- Organic Vegetable Festivals for farmers
- Computer Literacy Campaign for school children
- Sports promotion scheme for sportsman
- Educational material Aid to rural & tribal schools
- Modern education & superstition eradication

➤ Water – To make villages self-sufficient of drinking water

➤ Health – Malnutrition eradication

➤ Environment conservation

➤ Martyrs Family
➤ (Shahid Jawan) Fund

The unique social revolution on social media : 10 years of tribal & rural development

Nature of work: Finding solutions to health, education and water issues in tribal-rural areas.

Notable concept of using social media for social work

Pramod Gaikwad from Nashik city of Maharashtra state, came up with the idea of using social media for rural development by uniting thousands of youth on social media at the time when social sites were being used as a tool of disruption rather than a means of communication. The "Social Networking for Social Cause" campaign was launched in 2010 with the idea of transforming thought into an action. Surprisingly, the campaign received a huge response from social networkers. Everyone who participated in these social activities found great satisfaction and was permanently connected. We got senior people like Dr. Vinay Sahastrabuddhe, Shri. Jeevan Sonawane, Shri. Kishore Gore, late. Appasaheb Pawar as mentors. Dr. Pankaj Bhadane. Engg. Prashant Bachhav, Dr. Jaideep Nikam, Dr. Uttam Phartale, Ramdas Shinde, Sandeep Battase, Vijay Bharsat, Dr. Nilesh Patil, Yogesh Kasat, Rajesh Bakshi, Laxmikant Powanikar and hundreds of other contributors joined the forum and a great organization was formed for rural development in the fields of health, water and education.

SNF - A chain of rural development through health, job creation and modern education

If the whole society and the country is to prosper, the most important social service is to make people employable. Therefore, keeping in mind the same spirit from the very beginning of the campaign, emphasis is being laid on empowering tribal youth, women and farmers to stand on their own feet through Social Networking Forum. Under this initiative, guidance centers were set up for the youth

to get jobs in government and private sectors. To make it easier for tribal children to get jobs in urban areas, we also started training them for computer literacy from school age and making home-made products for women to start small home businesses. Regular festivals were also organized to market the organic farming products in the urban areas. Through this, SNF is making continuous efforts to bring people from rural-tribal areas into the mainstream of development.

In addition, due to the tremendous response to the concept of positive use of social media, financial assistance to the families of martyred Indian soldiers, help to orphanages and old age homes, planting and conservation of thousands of saplings, conversion of tribal schools into digital schools, computer literacy program for 5,000 tribal students are being implemented. Based on the triad of diet, diagnosis and treatment, 283 malnourished children in Trimbakeshwar taluka have been taken out of the state of malnutrition. Currently, work is underway to eradicate malnutrition by organizing counselling programs in some villages in the tribal areas.

Movement to enrich remote villages for drinking water..

Although the campaign has shed light on the lives of thousands of underprivileged in the areas of education and health with a focus on rural development, the most notable task of Social Networking Forum is to enrich the villages for water in all these initiatives. In 2015, there was a severe drought in Maharashtra. In many parts of the state, the news of the desperate need for water and the

rush for water tanker, began to appear in newspapers and on TVs. At this time, groups of women carrying pots on their heads were seen roaming in hilly areas. The villagers had to wander for miles for a pot of water. Recognizing the need of the situation, social networks were first made aware of the seriousness of the village water problems on Facebook, WhatsApp and other sites. A plan called the SNF Pattern was drawn up, about what problems these villages have, the available mechanism and how to solve them in collaboration with the villagers. As the crisis was so big, the question arose as to how many villages an organization like ours could help. But the forum team got to work. It informed the members about the dire situation of the villages they visited and what needs to be done to solve these problems. Many well-to-do people in the city read this information and started showing readiness to participate in this initiative and the public participation started increasing. It is a matter of great satisfaction that the team of Social Networking Forum succeeded in delivering water to the doorsteps of these tribal brothers of 22 villages in a short span of time through this unity of social networks. Now, many more villages are on the way to become water self-sufficient.

What you can do ?

To date, many villages have been made self-sufficient for water by the Social Networking Forum, but many villages in rural areas are still without water.

The SNF team is committed to provide drinking water to as many villages as possible depending on the availability of funds. We also focus on creating well-equipped guidance centers to create jobs and provide jobs to the youth. Many villages struggling with health, education and water issues are in touch with the Social Networking Forum and our team is trying to resolve these issues in the coming months through public participation and CSR schemes of corporate companies. The concept, which started as a campaign due to increasing participation, was transformed into a registered organization called Social Networking Forum in 2014. The organization has received 80G certificate as per the Income Tax Act and now the donors of the organization will also get exemption in income tax. Thus, on one hand, social media is being used to spread religious, ethnic and political hatred, while on the other hand, with the concept triggered by Mr. Pramod Gaikwad, SNF team has created a unique social revolution using the same social media. It will not take long for a prosperous and strong rural India to emerge soon if everyone contributes to this work. On this backdrop, it is our humble request to you to become partner in this noble cause of rural upliftment by contributing financially, technically or voluntarily in our endeavors.

- Social Networking Forum,

• Future planning

- ❖ **Water** - Efforts are underway to implement solutions to the drinking water problems in many of the villages in contact and the problem of these villages can be solved on funds availability.
How can you help? : By providing funds for new drought struck villages.
- ❖ **Education** - Unfortunately thousands of school children in rural areas do not get the required educational facilities. Efforts are being made to provide educational materials and opportunities.
Need : By supplying Educational materials and facilities in rural and tribal schools.
- ❖ **Competitive Examination Guidance Centre** -Competitive Examination Guidance Centres are being set up in tribal areas and efforts are being made to implement it as soon as possible.
Need : By funding to create infrastructural facilities at our study centres in tribal areas.
- ❖ **Eradication of Malnutrition** -Efforts are being made to eradicate malnutrition in tribal areas.
Need : Support financially or by expertise to help infants suffering from malnutrition.

समाज माध्यमांवरील सामाजिक क्रांतीतून आदिवासी – ग्रामविकासाची सलग १० वर्षे.

कार्याचे स्वरूप : आदिवासी- ग्रामीण भागातील आरोग्य, शिक्षण, आणि पाणी या समस्यांवरील उपाययोजना शोधणे

समाज माध्यमांचा सामाजिक कार्यासाठी वापराची अनोखी संकल्पना

सोशल साईट्स या संवादापेक्षा विसंवादाची साधनं बनतात की काय अशी शंका घेण्याइतपत नकारात्मक वापर होत असल्याच्या काळात महाराष्ट्राच्या नाशिक शहरातील प्रमोद गायकवाड यांनी सोशल मीडियावरील हजारो तरुणांना एकत्र करून ही शक्ती ग्रामविकासासाठी वापरण्याची संकल्पना मांडली. विचाराला कृतीची जोड देण्याच्या जाणिवेतून २०१० साली सोशल नेटवर्किंग फॉर सोशल कॉज हे अभियान सुरु केले. आश्चर्य म्हणजे अभियानाला सोशल नेटवर्कर्सचा प्रचंड प्रतिसाद मिळाला. या सामाजिक उपक्रमांमध्ये सहभागी होत गेलेल्या झालेल्या प्रत्येकाला मोठे समाधान लाभले आणि ते कायमस्वरूपी जोडले गेले. डॉ. विनय सहस्रबुद्धे, श्री. जीवन सोनवणे, श्री. किशोर गोरे, कै. अप्पासाहेब पवार यांच्यासारखे ज्येष्ठ लोक मार्गदर्शक म्हणून लाभले. डॉ. पंकज भदाणे. इंजि. प्रशांत बच्छाव, डॉ. जयदीप निकम, डॉ. उत्तम फरताळे, रामदास शिंदे, संदीप बत्तासे, विजय भरसट, डॉ. निलेश पाटील, योगेश कासट, राजेश बक्षी, लक्ष्मीकांत पोवनीकर असे तन मन धनाने योगदान देणारे शेकडो सहयोगी फोरम सोबत जोडले गेले आणि आरोग्य, पाणी आणि शिक्षण या क्षेत्रात ग्रामविकासासाठी एक उत्तम संघटना निर्माण झाली.

एसएनएफ - आरोग्य, रोजगार निर्मिती आणि आधुनिक शिक्षणाच्या माध्यमातून ग्रामविकासाची श्रृंखला

जर संपूर्ण समाज आणि देशाची प्रगती करायची असेल तर सर्वात महत्वाची सामाजिक सेवा म्हणजे लोकांना रोजगारक्षम बनवणे हे होय. त्यामुळे अभियानाच्या सुरुवातीपासूनच हेच ब्रीद लक्षात घेऊन सोशल नेटवर्किंग फोरमच्या माध्यमातून आदिवासी तरुण, महिला आणि शेतकऱ्यांना स्वतःच्या पायावर उभे राहण्यासाठी सक्षम बनवण्यावर भर दिला जात आहे. या उपक्रमांतर्गत तरुणांसाठी

शासकीय आणि खाजगी क्षेत्रात नोकऱ्या मिळवण्यासाठी मार्गदर्शन केंद्रे चालू केली गेली. आदिवासी मुलांना शहरी भागात नोकऱ्या मिळणे सोपे जावे यासाठी त्यांना शालेय वयापासून संगणक साक्षरता आणि महिलांना छोटे गृहोद्योग चालू करता यावेत यासाठी घरगुती उत्पादने तयार करण्याचे प्रशिक्षणही सुरु झाले. या भागातील सेंद्रिय शेती उत्पादनांना शहरी भागात बाजार उपलब्ध करून देण्यासाठी नियमित रानभाज्या महोत्सवही घेतले जाऊ लागले. या माध्यमातून ग्रामीण-आदिवासी भागातील लोकांना विकासाच्या मुख्य धारेत आणण्यासाठी एसएनएफ सातत्यपूर्ण प्रयत्न करत आहे.

यासोबतच समाजमाध्यमांचा सकारात्मक वापर करण्याच्या संकल्पनेला मिळालेल्या भरघोस प्रतिसादामुळे आजवर शहिद भारतीय जवानांच्या कुटुंबियांना आर्थिक मदत, अनाथालये-वृद्धाश्रमांना मदत, हजारो रोपांची लागवड आणि संगोपन, आदिवासी शाळांचे डिजिटल स्कुल्स मध्ये रूपांतर, ५००० आदिवासी विद्यार्थ्यांसाठी अद्ययावत संगणक कक्ष उभारून संगणक साक्षरतेचे धडे देणे, मुलांना क्रीडासाहित्याची मदत असे अनेक सामाजिक उपक्रम राबवले जात आहेत. आहार, निदान आणि उपचार या त्रिसूत्रीवर आधारित त्र्यंबकेश्वर तालुक्यातील २८३ बालकांना कुपोषित बालकांना कुपोषण अवस्थेतून बाहेर काढले आहे. सध्या आदिवासी भागातील काही गावांमध्ये समुदेशनाचे कार्यक्रम आयोजित करून कुपोषण निर्मूलनाचे कामही सुरु आहे.

दुर्गम खेड्यांना पिण्याच्या पाण्यासाठी समृद्ध करणारे अभियान.

ग्रामविकासाची कास धरून शिक्षण आणि आरोग्य या क्षेत्रात या अभियानाद्वारे हजारो वंचितांच्या जीवनात प्रकाश पडला असला तरी या सर्व उपक्रमात खेड्यांना पाण्यासाठी समृद्ध करणे हे सोशल नेटवर्किंग फोरमचे सर्वात लक्षवेधी काम आहे. २०१५ साली महाराष्ट्रात पावसाने दांडी मारली. राज्याच्या अनेक भागात सप्टेंबर ऑक्टोबर मध्येच विहिरींवरील पाण्यासाठीची जीवघेणी कसरत,

टॅकरच्या पाण्यासाठी होणाऱ्या गर्दीच्या भिषण दुष्काळाच्या बातम्या वर्तमानपत्रात आणि टीव्हीवर येऊ लागल्या. यावेळी आदिवासी आणि डोंगराळ प्रदेशातील गावोगावी डोक्यावर हांडे घेऊन महिलांचे जत्थे रानोमाळ फिरताना दिसू लागले. कळशीभर पाण्यासाठी मैलामैल पायपीट गावकर्यांच्या वाट्याला आली. परिस्थितीचे गांभीर्य ओळखून सर्वात प्रथम फेसबुक आणि व्हॉट्सअपवर गावोगावच्या पाणी समस्येचे गांभीर्य सोशल नेटवर्कर्सला अवगत करून देण्यात आले. या गावांना नक्की काय समस्या आहेत, उपलब्ध साधन सामग्री काय आहे आणि गावकर्यांच्या सहकार्याने त्या सोडवायच्या कशा यावर एसएनएफ पॅटर्न नावाने आराखडा तयार केला. संकट मोठे होते आपल्यासारखी एक संस्था किती गावांना मदत करू शकेल, किती लोकांचा प्रश्न सोडवू शकेल हा प्रश्न होताच. पण फोरमची टीम कामाला लागली. ज्या गावांची पाहणी केली त्यांच्या विदारक परिस्थितीची आणि या समस्या सोडवण्यासाठी काय करावे लागेल याची योग्य शब्दात नेटिझन्सला माहिती दिली. शहरातील अनेक सुखवस्तू सहृदय लोक ही माहिती वाचून या उपक्रमात सहभागी व्हायची तयारी दर्शवू लागले आणि बघता बघता लोकसहभाग वाढू लागला. अत्यंत समाधानाची बाब म्हणजे सोशल नेटवर्कर्सच्या या एकजुटीतून अल्पावधीतच २२ गावांना टॅकर मुक्त करून हजारो आदिवासी बांधवांच्या दारात पाणी पोहोचवण्यात सोशल नेटवर्किंग फोरमची टीम यशस्वी ठरली. अजून अनेक गावे टॅकरमुक्तीच्या वाटेवर आहेत.

जलाभियांतर्गत पाण्यासाठी स्वयंपूर्ण करण्यात आले असले तरी आजही ग्रामीण भागातील अनेक खेडे पाण्याशिवाय तडफडत आहेत. यातील शक्य तितक्या गावांना जमेल तसे आणि निधीच्या उपलब्धतेनुसार पिण्याचे पाणी देण्यासाठी एसएनएफची टीम कटिबद्ध आहे. रोजगार निर्मिती आणि तरुणांना नोकऱ्या मिळवून देण्यासाठी सुसज्ज मार्गदर्शन केंद्रे निर्माण करण्यावरही आमचा भर आहे. आरोग्य, शिक्षण आणि पाणी या समस्यांशी लढत असलेली बरीच गावं सोशल नेटवर्किंग फोरमच्या संपर्कात असून लोकसहभाग आणि कॉर्पोरेट कंपन्यांच्या सीएसआर योजनांतून या गावांचा प्रश्न येत्या काही महिन्यात सोडवण्याचा प्रयत्न टीम फोरम करत आहे. वाढत्या सहभागामुळे अभियान म्हणून सुरू झालेली ही संकल्पना २०१४ साली सोशल नेटवर्किंग फोरम या नोंदणीकृत संस्थेत रुपांतरीत झाली. संस्थेला इन्कम टॅक्स अधिनिमानुसार ८० जी प्रमाणपत्र प्राप्त झाले असून आता संस्थेच्या देणगीदारांना इन्कम टॅक्स मध्ये सूटही मिळणार आहे. अशा प्रकारे एका बाजूला समाजमाध्यमांचा धार्मिक, जातीय आणि राजकीय विद्वेष पसरविण्यासाठी उपयोग होत असताना दुसऱ्या बाजूला प्रमोद गायकवाड यांच्या संकल्पनेतून एसएनएफच्या टीमने याच समाज माध्यमांचा वापर करून एक अनोखी सामाजिक क्रांती घडवली आहे. आमच्या या प्रयत्नात आर्थिक, तांत्रिक किंवा स्वयंसेवेच्या रूपात यथाशक्ती योगदान देऊन या ग्रामविकासपर्वाचे साथीदार आणि साक्षीदार बना ही नम्र विनंती.

ग्रामविकासाच्या यज्ञात आपल्या समिधेची प्रतीक्षा

– सोशल नेटवर्किंग फोरम, नाशिक

आजवर बऱ्याच गाव खेड्यांना सोशल नेटवर्किंग फोरम

भविष्यातील नियोजन

- १) **पाणी** – संपर्कातील अनेक गावांच्या पाणी समस्येवर उपाय योजना राबविण्यासाठी प्रयत्न सुरू असून लोकसहभाग आणि कॉर्पोरेट क्षेत्राकडून आर्थिक मदत वाढेल तसे त्या गावांचा प्रश्न सोडवण्याचे नियोजन आहे.
- २) **शिक्षण** – दुर्दैवाने ग्रामीण भागातील हजारो शाळकरी मुलांना गरजेचे शैक्षणिक साहित्य मिळत नाही. १२ वि पेक्षा पुढे शिक्षण झालेल्या मुलांना उपजीविकेच्या संधी मिळत नाहीत. या समस्येवर उपाय म्हणून भविष्य काळात लोकसहभाग वाढवून जास्तीत जास्त मुलांना शैक्षणिक संधी उपलब्ध करून देण्याचा प्रयत्न करण्यात येत आहेत.
- ३) **स्पर्धा परीक्षा मार्गदर्शन आणि कौशल्य विकास केंद्रे** – सोशल नेटवर्किंग फोरमने आदिवासी भागातील मुलांना शासकीय आणि खाजगी क्षेत्रात नोकऱ्या मिळवण्यात यासाठी छोट्या स्वरूपात मार्गदर्शन केंद्रे सुरू केली आहेत. यातील तालुक्याच्या ठिकाणी दोनशे ते तीनशे लोक एकत्र बसू शकतील असे मोठी अभ्यास केंद्रांची निर्मिती करण्याचे एसएनएफचे प्रयत्न सुरू आहेत. यासाठी कॉर्पोरेट क्षेत्राकडून आर्थिक तरतूद प्राप्त झाल्यास शेकडो आदिवासी तरुणांच्या उपजीविकेची सोय होऊ शकेल.

सोशल मीडिया पर अनोखी सामाजिक क्रांति : आदिवासी और ग्रामीण विकास के १० साल

काम का स्वरूप : आदिवासी-ग्रामीण क्षेत्रों में स्वास्थ्य, शिक्षा और पानी के मुद्दों का समाधान खोजना।

सामाजिक कार्य के लिए सोशल मीडिया का उपयोग करने की अद्वितीय संकल्पना

महाराष्ट्र राज्य के नासिक शहर के प्रमोद गायकवाड़, सोशल मीडिया पर उस समय हजारों युवाओं को एकजुट करके ग्रामीण विकास के लिए सोशल मीडिया का उपयोग करने के विचार के साथ आए थे जब सोशल साइट्स को मित्रत्वता के साधन के बजाय असंतोष के उपकरण के रूप में इस्तेमाल किया जा रहा था। इस सोच को कृतीमें बदलने के विचारके साथ उन्होंने २०१० में सोशल नेटवर्किंग फॉर सोशल कॉज यह अभियान शुरू किया। हैरानी की बात है कि अभियान को सोशल नेटवर्कर्स से भारी समर्थन मिला। इन सामाजिक गतिविधियों में भाग लेने वाले सभी लोगों को काफी संतुष्टी मिली और वे स्थायी रूप से जुड़े गये। इस कार्य में डॉ. विनय सहस्रबुद्धे, श्री. जीवन सोनवणे, श्री. किशोर गोरे, डॉ. अप्पासाहेब पवार जैसे अनुभवी लोग हमारे दिशादर्शक बने। डॉ. पंकज भदाने, इंजि. प्रशांत बच्चव, डॉ. जयदीप निकम, डॉ. उत्तम फरताले, रामदास शिंदे, संदीप बत्तासे, विजय भरसट, डॉ. नीलेश पाटिल, योगेश कासट, राजेश बक्षी, लक्ष्मीकांत पोवनीकर और सैकड़ों अन्य योगदानकर्ता मंच में शामिल हुए और स्वास्थ्य, पानी और शिक्षा के क्षेत्र में ग्रामीण विकास के लिए एक महान संगठन का गठन किया गया।

एसएनएफ - स्वास्थ्य, रोजगार सृजन और आधुनिक शिक्षा के माध्यम से ग्रामीण विकास की एक शृंखला

यदि पूरे समाज और देश को समृद्ध बनाना है, तो लोगों को रोजगारपरक बनाना सबसे महत्वपूर्ण समाज सेवा है। इसलिए, अभियान की शुरुआत से ही इसी भावना को ध्यान में रखते हुए, सोशल नेटवर्किंग फोरम के माध्यम से आदिवासी युवाओं, महिलाओं और किसानों को अपने पैरों पर खड़े होने के लिए सशक्त बनाने पर जोर दिया जा रहा है। इस पहल के तहत, युवाओं को सरकारी और

निजी क्षेत्रों में नौकरी पाने के लिए मार्गदर्शन केंद्र स्थापित किए गए थे। आदिवासी बच्चों को शहरी क्षेत्रों में नौकरी पाने के लिए आसान बनाने के लिए, स्कूली उम्र से ही कंप्यूटर साक्षरता का प्रशिक्षण देना शुरू किया गया और महिलाओं के लिए घर से बने उत्पादों को बनाने के लिए छोटे घरेलू व्यवसाय प्रशिक्षण शुरू किए। शहरी क्षेत्रों में जैविक कृषि उत्पादों के विपणन के लिए नियमित उत्सव भी आयोजित किए जा रहे हैं। इसके माध्यम से, एसएनएफ ग्रामीण-आदिवासी क्षेत्रों के लोगों को विकास की मुख्यधारा में लाने के लिए निरंतर प्रयास कर रहा है।

इसके अलावा, सोशल मीडिया के सकारात्मक उपयोगसे, शहीद भारतीय सैनिकों के परिवारों को वित्तीय सहायता, अनाथालयों और वृद्धाश्रमों को मदद, हजारों पौधे रोपने और संरक्षण करने, आदिवासी स्कूलों के डिजिटल स्कूल में रूपांतरण, ५,००० आदिवासी छात्रों के लिए कंप्यूटर साक्षरता कार्यक्रम लागू किया गया है। आहार, निदान और उपचार के परीक्षण के आधार पर, त्र्यंबकेश्वर तहसील में २८३ कुपोषित बच्चों को कुपोषण की स्थिति से बाहर निकाला गया है। वर्तमान में, आदिवासी क्षेत्रों में कुछ गांवों में परामर्श कार्यक्रम आयोजित करके कुपोषण को खत्म करने के लिए काम चल रहा है।

पीने के पानी के लिए सुदूर गांवों को समृद्ध करने के अभियान।

यद्यपि इस अभियान ने ग्रामीण विकास पर ध्यान देने के साथ शिक्षा और स्वास्थ्य के क्षेत्रों में हजारों वंचितों के जीवन पर प्रकाश डाला है, इन सभी पहलों में सोशल नेटवर्किंग फोरम का सबसे उल्लेखनीय कार्य गांवों को पानी के लिए समृद्ध करना है। २०१५ में, महाराष्ट्र में भयंकर सूखा पड़ा। राज्य के कई हिस्सों में, पानी की सख्त जरूरत और टैंकर के पानी के लिए भीड़ की खबरें अखबारों और टीवी पर आने लगीं। इस समय, पानी के शोध में सिर पर बर्तन लेने वाली महिलाओं के समूह पहाड़ी क्षेत्रों में घूमते दिखने लगे।

पानी के घड़े के लिए ग्रामीणों को मीलों भटकना पड़ता था। स्थिति की आवश्यकता को समझते हुए, सोशल नेटवर्कर्स को पहले फेसबुक, व्हाट्सएप और अन्य साइटों पर गांव की पानी की समस्याओं की गंभीरता से अवगत कराया गया था। एसएनएफ पैटर्न नामक एक योजना तैयार की गई कि वास्तव में इन गांवों में क्या समस्या है, उपकरण सामग्री क्या उपलब्ध है और ग्रामीणों के सहयोग से उन्हें कैसे हल किया जाए। चूंकि संकट इतना बड़ा था, इसलिए सवाल यह उठा कि हमारे जैसी संस्था कितने गांवों को मदद कर सकती हैं। लेकिन फिर भी फोरम की टीम काममें जुट गयी। इसने अपने सदस्यों को गांवों की विकट स्थिति की और इन समस्याओं के समाधान के लिए क्या किया जाना चाहिए इसकी जानकारी दी। शहर के कई अच्छे लोगों ने इस जानकारी को पढ़ा और इस पहल में भाग लेने के लिए तत्परता दिखाने लगे। इस तरह सार्वजनिक भागीदारी बढ़ने लगी। यह बहुत संतोष की बात है कि सोशल नेटवर्किंग फोरम की टीम ने सोशल नेटवर्कर्स की इस एकता के माध्यम से अल्प समय में २२ गांवों के हजारों आदिवासी भाइयों के घर-द्वार तक पानी पहुंचाने में कामयाबी हासिल की। अब, कई और गांव पानी के लिए आत्मनिर्भर बनने की राह पर हैं।

ग्रामीण विकास के यज्ञ में आपके सहयोग की प्रतीक्षा

आज तक, कई गांवों को सोशल नेटवर्किंग फोरम कि जल योजना तहत पानी के लिए आत्मनिर्भर बनाया गया है, लेकिन ग्रामीण

इलाकों के कई गांवों में अभी भी पानी नहीं है। एसएनएफ टीम अधिक से अधिक गांवों को धन की उपलब्धता के अनुसार पेयजल उपलब्ध कराने के लिए प्रतिबद्ध है। हम नौकरियों का सृजन करने और युवाओं को रोजगार प्रदान करने के लिए अच्छी तरह से सुसज्जित मार्गदर्शन केंद्र बनाने पर भी ध्यान केंद्रित करते हैं। स्वास्थ्य, शिक्षा और पानी के मुद्दों से जुझ रहे कई गांव सोशल नेटवर्किंग फोरम के संपर्क में हैं और एसएनएफ टीम आने वाले महीनों में सार्वजनिक भागीदारी और कॉर्पोरेट कंपनियों की सीएसआर योजनाओं के माध्यम से इस मुद्दे को हल करने की कोशिश कर रही है। बढ़ती भागीदारी के कारण अभियान के रूप में शुरू हुई यह अवधारणा २०१४ में सोशल नेटवर्किंग फोरम नामक एक पंजीकृत संगठन में बदल गई। संगठन को आयकर अधिनियम के अनुसार ८० जी प्रमाण पत्र प्राप्त हुआ है और अब संगठन के दाताओं को भी आयकर में छूट मिलेगी। इस प्रकार, एक ओर, सोशल मीडिया का उपयोग धार्मिक, जातीय और राजनीतिक घृणा फैलाने के लिए किया जा रहा है, जबकि दूसरी ओर, प्रमोद गायकवाड़ की अवधारणासे एसएनएफ टीमने उसी सामाजिक मीडिया का उपयोग करके एक अद्वितीय सामाजिक क्रांति बनाने का नेतृत्व किया है। यह हमारा विनम्र निवेदन है कि आप हमारे प्रयासों में आर्थिक, तकनीकी या स्वैच्छिक रूप योगदान देकर इस ग्रामीण विकास क्रांति के भागीदार और साक्षी बनें।

– सोशल नेटवर्किंग फोरम, नाशिक

भविष्य की योजना

- १) **पानी** – एसएनएफके संपर्क में कई गांवों की पानी की समस्याओं के समाधान को लागू करने के लिए प्रयास चल रहे हैं। सार्वजनिक भागीदारी और कॉर्पोरेट क्षेत्र से वित्तीय सहायता जैसे जैसे बढ़ेगी वैसे उन गांवों की समस्याओं को हल करने की योजना बनाई गई है।
- २) **शिक्षा** – दुर्भाग्य से ग्रामीण क्षेत्रों में हजारों स्कूली बच्चों को आवश्यक शैक्षिक सामग्री नहीं मिलती है। १२ वीं कक्षा से आगे शिक्षित बच्चों को आजीविका के अवसर नहीं मिलते हैं। इस समस्या के समाधान के रूप में, भविष्य में सार्वजनिक भागीदारी बढ़ाकर अधिक बच्चों को शैक्षिक अवसर प्रदान करने का प्रयास किया जा रहा है।
- ३) **प्रतियोगी परीक्षा मार्गदर्शन और कौशल विकास केंद्र** – सोशल नेटवर्किंग फोरम ने सरकारी और निजी क्षेत्र में नौकरी पाने के लिए आदिवासी बच्चों के लिए छोटे पैमाने पर मार्गदर्शन केंद्र शुरू किए हैं। उसके आगे जाते हुये एसएनएफ तालुका में बड़े अध्ययन केंद्र स्थापित करने की कोशिश कर रहा है, जिसमें २०० से ३०० लोग बैठ सकते हैं। कॉर्पोरेट क्षेत्र से वित्तीय प्रावधान प्राप्त होने पर सैकड़ों आदिवासी युवा जीविकोपार्जन कर सकेंगे।

Pure water is world's first and foremost **medicine..!**

Objective : To make villages self-sufficient of drinking water through public participation

Importance and Impact of the projects :

There are thousands of villages in our country where people still do not have access to drinking water. Every summer, people in tribal areas have to roam with pots on their heads in search of water or rely on government tankers. In view of this dire situation, Social Networking Forum decided to provide drinking water to these unfortunate people from 2015 onwards. For this, a three-pronged approach called SNF Pattern was developed with the technical contribution of our team, volunteers from the villages and

financial assistance through public participation. Under this scheme, the experts of the forum find a good source of water around the drought stricken villages and carry out water conservation work there with the help of the villagers. After the permanent water source for the future is created, water is brought to the doorsteps of the people through a pipeline. By making positive use of social media in this way, SNF has quenched the thirst of thousands of people through public participation. Many villages are waiting to become self-sufficient for water through Forum. If you would also like to participate in this noble work of providing drinking water to your unfortunate compatriots, you are welcome....

Backdrop of Indian drought-stricken villages

It is unfortunate that even after so many years of independence, drinking water is not available to many people in the tribal and rural areas of our country. It is true that there is a lot of rain in the tribal areas but most of the water is washed away due to hilly terrain. Therefore, these villages remain thirsty in summer. Having to spend four to five hours a day to get water is detrimental to agriculture for men, household chores for women and children's education. Water scarcity leads to many health problems. Outbreaks appear to be exacerbated because of drinking of contaminated water. Youngsters do not get married because of the water crisis, as girls do not want to be married to these young men from such drought-hit villages. Thus, the Social Networking Forum observed that people in thousands of villages in the country are facing many problems related to social, educational, health and livelihood due to lack of water alone. On this backdrop, it was decided to find a permanent solution to the rural-tribal water problem in 2015. Since then, the Forum has been working tirelessly to provide drinking water to these thirsty brothers of the country.

No water until Government tanker arrives at the village

Women have to carry water for miles

A littel village girl collecting water from an unclean puddle

Senior citizens also have to fetch water from deep wells

Waiting for water is the destiny...

SNF Pattern

A long term, cost effective solution for water scarcity in difficult terrains developed by Social Networking Forum

In the last several years after independence, the government has implemented water supply schemes in many villages in our country. However, due to improper planning, lack of technical knowledge or corruption, the schemes in many of these villages failed. It is very unfortunate that many people in our country still have to work hard to get drinking water. Seeing this situation the Social Networking Forum team decided to solve this problem for these villages. To do so, a team of geologists, engineers and water conservation experts was formed by the Forum. The team visited many drought-hit villages and studied the water problems there. A visit to these villages revealed that many villages had remnants of water tanks, wells or pipelines from earlier failed government water supply schemes. The study tour showed that the village water problem can be solved with less effort if the available materials are used after some repairs. Accordingly, a technique was developed in the village to solve the water problem of the village at a very low cost using good materials from the previous Govt. scheme. In addition, the villagers were encouraged to volunteer to make sure their involvement in this work. Thus, instead of depending only on the Government, this technique of enriching the villages for water through the contribution of all, is now known throughout the state as the SNF pattern. The Social Networking Forum solved the water scarcity problem of these villages in which the government's water supply scheme failed despite spending Rs 30 to 40 lakh at a very low cost of Rs 4 to 7 lakh. Today, it is a matter of pride that with the help of this SNF pattern, many villages are becoming self-sufficient for drinking water in the direction of tanker free India..

Team SNF

Unused water tank from earlier failed scheme used successfully in SNF pattern

Water lifted from the well from earlier scheme used to resolve water issue

Drinking Water Projects for villages

A unique success story that ends water scarcity...

Since its inception to enrich the villages for drinking water, Social Networking Forum has achieved unprecedented success in alleviating water scarcity in many villages. It is also a matter of pride that the SNF pattern developed by the Forum has ignited a ray of hope in the lives of many other thirsty villages. It is not possible to list all these villages due to lack of space. Therefore, in order to introduce the work of the forum, we are giving information about some villages that have become self-sufficient for drinking water.

Information of the villages that have become self-sufficient for water..

➤ Gadhaipada (Peth) :

Population - 450

Nature of work : Water source was available at 1 KM from the village. We provided remaining material & water was brought at the door step of the villagers.

Kind Cooperation :

- Storewell Company, Nashik

➤ Torangan (Trimbak):

Population - 2300

Nature of work : In addition to the water scarcity, there was also the problem of contaminated water. So the ratio of diseases was very high. From SNF's scheme water purification system was installed in the village by bringing water from 2.5 kilometers.

Kind Cooperation :

- SNF Members donations

➤ **Shevkhandi (Peth) :**
Population - 950

Nature of Work : It was an ambitious project to provide drinking water to three neighboring villages, Shevkhandi, Khotarepada and Phanaspada. At a distance of 2.8 km from the village, we found a good water source. The villagers dug a well and the forum supplied water to all the three villages. These villages, which have been thirsty for the last several years, now have water in all seasons.

Kind Cooperation : Indian Medical Assoc., Nashik branch & SNF Members donations

➤ **Malegaon (Tryambak):**
Population – 1400

Nature of work : The villagers had to work hard to fetch water from the well at a distance of 1.5 km from the village. With the participation of the people, the plight of the village came to an end with the construction of pipeline and water tank.

Kind Cooperation :

- Govt. Public school Ex Students Org., Nashik - Dhule

➤ **Khotarepada (Peth) :**
Population - 250

Nature of work : Joint project of Shevkhandi, Khotarepada and Fanaspada

Kind Cooperation :

- Indian Medical Assoc., Nashik branch &
- SNF Members donations

➤ **Fanaspada (Peth) :**
Population – 385

Nature of work : Joint project of Shevkhandi, Khotarepada and Fanaspada

Kind Cooperation :

- Indian Medical Assoc., Nashik branch &
- SNF Members donations

Drinking Water Projects for villages

➤ Vadpada (Peth) :

Population - 650

Nature of work : Situated on a high hill, the villagers had to descend into a dangerously deep valley to fetch water in summer. As a solution to this, water was brought to the village from a well dug on the bank of a water stream flowing through the valley and the water scarcity was permanently solved.

Kind Co-operation :

- Sparten group & SNF member's donation

➤ Vajwad (Peth) :

Population – 750

Nature of work : This village is in a hill area. In summer, it used to take at least 2 hours to fetch a pot of water from a well on a hillside. By lifting water from this well and bringing it to the village, now water is available at the door step of the villagers.

Kind Co-operation :

- Obstetrics & Gynecological Society- Nashik,
- 1998 MBBS Batch-MGM College- Navi Mumbai

➤ Hedpada (Tryambak) :

Population - 450

Nature of work : There was a well in the previous plan at some distance from this village. After ensuring the permanent water in it we brought water in the village which has now perennial water supply.

Kind Co-operation :

- BharatiVidyapeeth 1995 MBBS Batch, Pune
- Rotary Club of Nashik Airport

➤ Kotambi (Surgana) :

Population - 700

Nature of work : This village is also situated on a hillside. So they had to rely on tankers for water. Even the wells at the bottom of the hill had no water in summer. After the water conservation work around this well with the help of the villagers the problem was solved permanently and the water was brought to the village.

Kind Co-operation :

- Mr.YogeshKasat and NRI Friends from USA

➤ **Pangulghar (Tryambak):**

Population- 550

Nature of work : Infamous in drought prone areas, the village was 100% dependent on tankers. SNF found a source of water on the bank of river at the base and villagers dug a well. It was a very challenging work, SNF made water available to the villagers by laying pipeline and motor pump.

Kind Co-operation :

- Jeevan n Vijaya Sonawane, 2004 RTO Batch, Maharashtra.

➤ **Kolushti (Peth) :**

Population - 480

Nature of work : This village was completely dependent on tanker. A search around the village turned up a well with permanent water source 3 KM away. The serious problem was solved by lifting water by pipeline to the village.

Kind Co-operation :

- Advanced Enzymes, USA \ Thane

➤ **Kelbari (Peth) :**

Population - 375

Nature of work : There was a well in the valley at some distance from the village but it was very difficult to fetch water from there every day. A tank was built in the village and water was brought from this well and water was made available at the door step of the villagers.

Kind Co-operation :

- Jivhala Senior citizens Group, Nashik

➤ **Sapgaon (Tryambak) :**

Population - 950

Nature of work : The water problem in this village was very serious. After inspecting the place, a source of water was found at a distance of 2 km from the village, a well was dug there and water was made available in the village.

Kind Co-operation :

- Dr. Samir Pawar Family - In memory of Late Dr. Appasaheb Pawar

Drinking Water Projects for villages

➤ Metghar Killa (Tryambak) :

Population - 350

Nature of work : Situated on a very high hill, this village has had water problem for the last several years. There is a dam at the bottom of the mountain but it was simply impossible to bring water from there. So a well was dug on the bank of the dam and the pipeline brought water to the village. Now there is a water tap in front of every house.

Kind Co-operation :

- Mr. Chetan / Mrs. Babita Thakkar, USA \ Mumbai

➤ Ekdara (Peth) :

Population - 1250

Nature of work : Once upon a time, there was a big problem of contaminated water in this village. Outbreaks appear to be exacerbated during this time. A water purification system was installed here and pure water was supplied to the village.

Kind Co-operation :

- MP Fund of Dr. Vinay Sahastrabuddhe

To be inaugurated soon

➤ Khokartale (Peth) :

Population - 950

Nature of work : Every year, the people here had two options, either to fetch water from a long distance or wait for a tanker once a week. As a solution to this, water was brought to the village from a well located at some distance from the village.

Kind Co-operation :

- MP Fund of Dr. Vinay Sahastrabuddhe

Some more villages will become water self-sufficient soon...

Village	Kind Co-operation

“

Be a responsible citizen, stand with the martyrs family..

”

The people who have really made **history** are **martyrs...!**

Objective : To make financial provision for the families of martyrs who sacrificed their lives for our country.

Importance of the project & it's Impact on the society : Year after year, many soldiers serving in the defence forces are martyred while fighting the enemy at the border and terrorists within the country. With their departure, however, the families of these real life heroes have to go through immense grief. The sudden departure of the head of the family puts many families in financial strain and often raises the question of their children's education. That is why the Social Networking Forum launched the “Shaheed Jawan Fund scheme” with the awareness that financial assistance should be

provided for the education of their children after them. The main objective of this initiative is to create respect among the youth for the soldiers who have sacrificed for their country and to create awareness of the responsibility towards the country amongst the youth. The post on social media received a huge response from hundreds of young people. Their support provides financial assistance for the education of the children of martyrs. It is the duty of everyone in the country to do at least this much to help the families of these brave heroes who do not even care about their own lives so that ordinary citizens like us can live happily. We are truly proud to be contributing to the young generation who are fulfilling this duty towards our beloved country.

“

**A drive
towards
employment
generation..**

”

True charity is not in giving bread or money, but through providing employment

Objective : *To increase employment opportunities for tribal & rural people & to reduce the social inequality between rural and urban population.*

Importance and Impact of the projects :

If the whole society and the country is to prosper, the most important social service is to provide employment. With this in mind, Social Networking Forum is working to enable tribal youth, women and farmers to stand on their own feet. Under this initiative, we have set up guidance centers for youth to get jobs in government and private sectors. Work is also underway to make tribal children computer literate from school age to make it easier for them to get jobs in urban areas. We are also training women to make some small products so that they can start a home-based business. Organic farming products are

widely grown in this area. Vegetable festivals are held to market their agricultural products in urban areas. Through this we are trying to make them employable & bring people into the mainstream of development by creating employment in rural and tribal areas.

Ongoing Projects :

- *Competitive exams Guidance centers for youngsters*
- *Higher Education Assistance for students*
- *Skill Development for women.*
- *Organic Vegetable Festivals for farmers*
- *Computer Literacy Campaign for school children*
- *Sports promotion scheme for sportsman*
- *Educational material Aid to rural & tribal schools*
- *Modern education & superstition eradication*

SNF Initiative :

Competitive exams study Centers

Objective : To provide guidance for rural - tribal youngsters to get Government jobs and provide assistance for higher education.

Importance and Impact :

The spread of education and the colleges opened in the Taluka places has recently led to an increase in the number of graduate children in tribal areas. But after this, it is not possible for many students to go to big cities for further education or to prepare for competitive exams. So even after graduation these children have no choice but to work in agriculture or as daily wage labor. So the Social Networking Forum has started competitive examination guidance centers to help children to get government jobs. In addition, we are providing the necessary facilities to the study centers started in small villages. Social Networking Forum also helps poor children with higher education facilities and helps them with books, hostel and college fees through public participation on social media. It is noteworthy that this scheme has helped many poor students to complete their higher education and build their careers.

सोशल नेटवर्किंग फोरमच्या माध्यमातून शेवखंडी येथे सर्व सुविधांयुक्त अभ्यासिकेचे उद्घाटन. यावेळी सोशल नेटवर्किंग फोरमचे अध्यक्ष डॉ. विठ्ठलराव शिंदे यांच्या हस्ते उद्घाटन करण्यात आले. यावेळी डॉ. शिंदे यांनी या अभ्यासिकेचे उद्देश्य व महत्त्व याबतून सर्वांना अवगत करून दिले. यावेळी डॉ. शिंदे यांनी या अभ्यासिकेचे उद्देश्य व महत्त्व याबतून सर्वांना अवगत करून दिले. यावेळी डॉ. शिंदे यांनी या अभ्यासिकेचे उद्देश्य व महत्त्व याबतून सर्वांना अवगत करून दिले.

SNF Initiative :

Skill Development Camps

Objective : To train women in rural - tribal areas to make home-made products so that they can start a home-based business.

Importance and Impact :

Cultivation in tribal area is done only in the rainy season. As a result, people have to migrate to nearby cities in search of livelihood after the October. During this time many students education is disrupted. To stop this the Social Networking Forum is arranging sessions for tribal women to make household items such as candles, incense sticks, sewing and food items. We also help them to make these products popular in the cities by using social media. These training camps are conducted by taking expert trainers from the cities to the villages. Raw materials are made available to women and ready-made items are brought to the city to help sell. Through this we are trying to provide employment to a large number of rural women. As employment is created, the rate of migration decreases and the education of children continues on a regular basis.

SNF Initiative :

Organic Vegetable Festival

Objective : *To increase the income of farmers by organizing festivals of vegetables grown in rural and tribal areas in the city and to provide healthy organic vegetables to the people of the city.*

Importance and Impact :

Many a variety of organic vegetables grow in the mountain valleys of tribal areas during the monsoon and other seasons. These vegetables are extremely healthy and grown without the use of any pesticides. The Social Networking Forum organizes the Vegetable Festival to make these vegetables available in the market in the city. This provides nutritious food to the people of the city and helps in increasing the income of farmers.

SNF Initiative :

Computer Literacy Campaign

Objective : To increase job opportunities for youth in rural / tribal areas by making them computer literate.

Importance and Impact :

The 21st century is an age of computers and therefore lack of computer knowledge is like being illiterate. Lack of computer knowledge makes it difficult to get a job and start a business. However, due to poverty in rural areas and lack of computer education institutions, it is difficult to get modern education. So, the social networking forum has started computer labs in tribal areas by getting computers from corporate companies. The great success of this initiative is that thousands of children in rural areas are becoming computer literate at school and college age. It is a matter of great satisfaction to us that these children come to the city with great confidence and create their own identity in higher education, jobs or business.

Adivasi students excel in Microsoft exam

Shivaji Maharaj COLLEGE ROAD

The adivasi students sponsored by Silicon Valley have made their benefactors proud by coming out with flying colours in their online exams. Girish Pachi and Subhash Perra from the interior of Satpada have successfully passed Microsoft's International Online Certificate Examination. Last year Silicon Valley supported the adivasi pockets of Satpada and after thorough research se-

Ashrunishala in Akkalkura taluka, which comprises barely of 20-25 houses, is however an exception. The director of ISI Ashrunishala, Dr. Kamalini Tatiya, always strives to impart modern education to his students. Silicon Valley had selected three underprivileged students from this ashrunishala for sponsoring their IT education. These students were admitted in the Dhole branch of Silicon Valley in the last academic year (2010-2011). These students had never been to a city be-

after he learnt about it. "We have been sponsoring students from the past five years. This year, we thought of providing scholarships for adivasi students and hence conducted the survey," informed Galkwad.

Silicon Valley has always indulged in social work. The director Prasad and Nishik Galkwad admitted these students in class XI (Science) in Dhole and have also made provisions for their food and accommodation. The boys were prepared by Silicon Valley to complete their SSC exams within a year and become IT literates. The intention behind this, the directors in turn, is to enable the students to pay for their higher education. The directors are happy that the boys have lived upto their expectations. While completing the institution's one year SCNA course, these boys have scored A grade in it. "We want to be IT engineers," said the students at the press conference.

Seeing the success of these students and enthusiasm of Dr. Tatiya, Silicon Valley has offered to provide free IT education to the students of class VIII-X. They have also drafted out a syllabus for these students. "We have also set up a computer lab in the ashrunishala and will be starting the course this academic year. We will carry on with our sponsorship every year," informed Prasad Galkwad.

Along with the students, Girish and Subhash Galkwad and entire board of Silicon Valley, Dhole, Nagar Galkwad, Nashik centre head Pankaj Gokhale, coordinator Prakash Galkwad, Ma-

lected the students for sponsorships. Girish passed the certificate exams scoring 1000 out of 1000 marks while Subhash scored 985 marks out of 1000. This was informed at a press conference yesterday by the director of ISI.

Score setting their first in Dhole. Sharing their experience, they informed that they did not know what a computer meant before they were selected for the sponsorship. Even language was a problem, but Silicon Valley trained

Tribal & Rural Upliftment

SNF Initiative :

Sports promotion scheme

Objective : Sport Materials and guidance to help tribal-rural children to become proficient in sports.

Importance and Impact :

Children in tribal areas are very hardworking and industrious. Although they are very good at running, gymnastics, boxing, kabaddi, volleyball they cannot make much progress due to lack of opportunities. To this cause, the Social Networking Forum encourages students to play by providing them with playgrounds, materials, guidance by organizing sports competitions. Some of the players that SNF has helped have achieved success nationally. We are trying to make national-international level players in the future.

बिरसा मुंडा व्हॉलीबॉल क्लब अजिंक्य ५२ संघांचा सहभाग : खिरकडे येथे खुल्या व्हॉलीबॉल स्पर्धा

SNF Initiative :

Educational material Aid to rural & tribal schools

*Without education wisdom was lost, Without wisdom morals were lost
Without morals development was lost, Without development wealth was lost
Without wealth grassroots level people were ruined,
So much has happened through lack of education*

- Mahatma Jyotiba Phule

Objective : To reduce the dropout rate by providing educational materials and facilities to poor students in rural \ tribal areas.

Importance and Impact :

Due to the limited means of sustenance in remote tribal areas, the economic situation of the people here is precarious. Some parents are so poor that they can't even afford school supplies for their children. Many people live in remote areas. From there you have to walk four to five kilometers to school. In such a situation, many students, especially girls, drop out of school. Therefore, the social networking forum works to provide educational equipments like books, compass boxes, pens, pencils to these poor children. We also try to provide bicycles to girls who come to school from far away. This initiative has helped poor tribal students to stay in the mainstream of education as well as reduce the number of children dropping out of school.

SNF Initiative :

Modern education & Digital School

Objective : To increase the comprehensive abilities of students by making modern education available in rural areas through audio-visual media.

Importance and Impact :

Recently many different experiments are taking place in the field of education. It has been found that these new methods of education increase student's interest in learning and make them understand easily, what is being taught. Such experiments and tools are immediately available in urban schools. Children in rural areas, however, are deprived of this modern education. With this in mind, the Social Networking Forum is trying to make digital learning tools available through public participation in schools in remote areas. Under this initiative, projectors and school curriculum in digital form have been made available to many schools for teaching through audio-visual medium, which has enhanced the comprehension of the students.

आदिवासी शाळांमध्ये ई लर्निंग सिस्टीम

म. टा. प्रतिनिधी, नाशिक

सोशल नेटवर्किंग फोरम आणि डॉ. वसंतराव पवार वैद्यकीय महाविद्यालय १९९६ बॅच यांच्या संयुक्त विद्यमाने ग्रामीण व आदिवासी अशा पेट व इगतपुरी तालुक्यातील पाच शाळांना ई लर्निंग सिस्टीम प्रदान करण्यात आल्या. तहसीलदार हरेच भामरे यांच्या उपस्थितीत तालुक्यातील डेरापाडा, पेट नं. १, खंबाळे, गढईपाडा, वडाचीवाडी आदी पाच

यातून अडीच लाख रुपयांचा निधी उभा करून, पाच आदिवासी शाळांना ई लर्निंग सिस्टीम देण्यात आल्या. एखादो व्यक्ती निवर्तल्यावरही आपल्या प्रेरणेतून वंचितांच्या दारी ज्ञानाचा दिवा लावू शकते याचे हे उत्तम उदाहरण ठरल्याची चर्चा परिसरात होती.

फोरमचे समन्वयक रामदास शिंदे यांनी प्रास्ताविक केले. शरद वडजे यांनी सूत्रसंचालन तर प्रविण गायकवाड यांनी आभार मानले. यावेळी

SNF Initiative :

Scientific approach & personality development

Objective : To increase the confidence of rural children and inculcate a scientific temperament in them.

Importance and Impact :

Superstitions are prevalent in rural, especially tribal areas. They need to get out of this trap at an early age. Besides, the children in these areas are shy to speak. With proper training, their shortcomings can be overcome. Hence, the Social Networking Forum is regularly organizing personality development and superstition eradication programs in rural schools. Many of our volunteers go to rural areas to train these children. SNF's initiative has made a positive difference in the lives of thousands of children in tribal areas and helped them to inculcate a scientific outlook.

“

**If you can't feed
hundred people,
then feed just
one..!**

”

If we conquer space, we can conquer childhood hunger..!

Objective : *To eradicate malnutrition through three tiered process of diagnosis, treatment and diet*

Importance of the project & it's Impact on the society : *When the SNF goes to tribal areas to provide education and water facilities, we see many malnourished children. Occasionally there are reports of severely malnourished children dying. Once, news came that 56 children had died of malnutrition in a very short period of time in Nashik district. After reading that news, we felt sad & therefore decided to work on this issue. A team of government officials, doctors and chemists was formed and it was decided to implement on an experimental basis by creating a malnutrition eradication program based on diagnosis, treatment and diet. We raised funds by appealing on social media. Under this, 353 malnourished children from 75 villages in Trimbakeshwar area were regularly*

examined and treated. We were extremely happy that we managed to get 282 children out of malnutrition in just four months by implementing our program. Even after this, the work of the Social Networking Forum for Malnutrition eradication is going on regularly. As a result of this success, we are satisfied that many organizations are working to eradicate malnutrition on the basis of the formula developed by SNF.

Future planning - *SNF team is working to eradicate malnutrition in as many villages as possible with available resources. However, if this very sensitive work is to be extended to a larger area, financial funding is needed. With the support of corporate companies and social organizations, thousands of malnourished children can be saved by timely intervention & treatment.*

“

**A movement
to cultivate
love for the
environment...**

”

Caring a **tree** is caring of your **soul...!**

Objective : To use the power of youth and villagers to conserve the environment to combat global warming.

Importance of the project & its Impact on the society :

Social Networking for Social Cause is a movement based on the proper use of modern communication tools. So of course, the response and involvement of the youth in this organization is a must. Tree planting and conservation activities were undertaken with the aim of harnessing this youthful vigor. Under this, trees are planted in public places in cities with the help of college youth. It is a matter of satisfaction that these children, who have been made aware of their responsibility, come to water these plants on holidays and other cultivated cayenne trees. In addition, the villages which have been provided water by the Social Networking Forum are encouraged to plant trees. In this way, by planting thousands of trees in urban as

well as rural areas, SNF has also made its mark in environmental conservation.

Future planning - The SNF team will move to build a green country by involving as many young people as possible in the coming years. Young people must contribute to this initiative..

Cultural Relations (ICCR)

सुदूर गांवों में जहां सड़कें नहीं हैं, वहां लोगों को स्वास्थ्य, शिक्षा और पेयजल उपलब्ध कराने के लिए काम करने वाली सोशल नेटवर्किंग फोरम को देखकर खुशी हुई। महत्वपूर्ण बात यह है कि इन गतिविधियों को ग्रामीणों की मदद, फोरम मंच के तकनीकी योगदान और सोशल मीडिया से वित्तीय मदद से बहुत कम लागत पर किया जा रहा है। यह देखते हुये मेरे सांसद निधी से तीन गांवों को एसएनएफ के माध्यम से टैंकर मुक्त करने में मदद करने का फैसला किया। इन गांव के लोगों के लिए आज शुद्ध पानी उपलब्ध है इस बात का मुझे बहोत संतोष है। मैं प्रमोद गायकवाड़ और उनके सहकारियों द्वारा शुरू किए गए इस काम के लिए अपनी शुभकामनाएं देते हुये आगे भी योगदान देनेका प्रयास करूंगा ।

Although I stay in USA, I witnessed philanthropic work of Social Networking Forum on social media & started participating occasionally. Such effective and appropriate use of social media for tribal and rural development is rarely seen not only in India but also in the United States or elsewhere. Every day we see social media being misused. Against this backdrop, since 2010, the SNF movement has instilled social consciousness in hundreds of young people and encouraged them for social and national work. This achievement of Pramod Gaikwad and all his associates is very commendable and exemplary. Good luck to them in their work!

गेल्या अनेक वर्षांपासून सोशल नेटवर्किंग फोरमच्या पर्यावरण आणि पाणी या विषयातील काम बघत आहे आणि त्यात सहभागीही होत आहे. शहरात आणि ग्रामीण भागात हजारोच्या संख्येने वृक्ष लागवड आणि संवर्धन करून पर्यावरणाच्या संरक्षणासाठी एसएनएफ महत्वपूर्ण काम करत आहे. ज्या गावातील पाणी प्रश्न सोडवला त्या गावकऱ्यांकडून वृक्ष संवर्धन करून घेण्याची अभिनव संकल्पना एसएनएफ राबवत आहे. ग्रामविकासाच्या ध्येयाने प्रेरीत झालेले आणि निष्ठेने काम करणारे लोक फोरमच्या टीममध्ये एकत्र येणे हे एसएनएफच्या यशस्वी कार्यप्रणालीचे यश आहे. फोरमच्या भावी उपक्रमांसाठी हार्दिक शुभेच्छा.

Congratulations to the entire team on the completion of the Decade of the Forum. From the very beginning, the forum has been helping all the needy people by cultivating social commitment. Transparent management, excellent work planning and proper information exchange are the features. Good luck to everyone in the forum. Proud to be a part of the forum.

I have a pleasure to meet some of the finest dedicated volunteers like Pramod Gaikwad, Dr. Pankaj, Er. Prashant, Mr. Shinde and team. Not only Prabha and me admire their quest for doing good for society but participated with couple of projects as a donor. They had planned and executed those project ahead of time line and within budget with the involvement of community volunteers. We were very impressed and surprised. I greatly urged everyone to get involved in any way you can and help their work grow TOGETHER. I am proud to say that we are their partners and volunteers.

केशवसृष्टी पुरस्काराच्या निवड समितीतर्फे आम्ही पाचजणी श्री प्रमोद गायकवाड यांच्या सोशल नेटवर्किंग फोरमतर्फे पाणी समस्या सोडवलेल्या नाशिक जिल्ह्यातील एका आदिवासी पाड्याला भेट दिली. इथल्या महिलांना दररोज पाणी आणण्यासाठी जावे लागत असलेली खोल दरीतील जीवघेणी पायवाट प्रत्यक्ष उतरून बघितली. थोडा लोकसहभाग, फोरमचे अर्थसहाय्य, तज्ज्ञांचे फुकट मार्गदर्शन यामुळे पाणी बारा महिने चालू आहे हे सांगताना त्यांच्या चेहऱ्यावरील आनंद खूप काही बोलून गेला. कार्यकर्त्यांकडून फोरमचे ईतरही काम वर्षागणिक कसे वाढत आहे याचीही माहिती घेतली. त्यामुळे फोरम आणि संस्थापक प्रमोद गायकवाड यांची आम्ही त्वरित पुरस्कारासाठी निवड केली. या आणि अशा अनेक दुर्गम गावांतील हजारो लोकांना पिण्याच्या पाण्याचा हक्क मिळवून देणारी ही चळवळ तरुणांसाठी प्रेरक ठरली आहे ही गौरवास्पद बाब आहे.

Pramod Gaikwad – Mr. Pramod decided to use social media for tribal & rural development and started the Social Networking for Social Cause movement in 2010. The concept was well received by Indians in the country and around the world which then transformed into a nonprofit in the name of Social Networking Forum. Since its inception, Mr. Pramod is planning and coordinating all the rural development activities carried out by SNF. Today, it has become a beacon of hope for thousands of underprivileged in the areas of health, water and education. More importantly, it has become a unique example of how any medium can be used positively for the development of mankind.

Dr. Pankaj Bhadane – Dr. Bhadane is a gynecologist by profession. He was overwhelmed by the urge to help the families of the martyred soldiers and joined SNF. Since then, he has been instrumental in raising funds for the various activities. He is also part of malnutrition eradication program being carried out by SNF.

Dr. Jaideep Nikam - Director of Yashwantrao Chavan Open University, Dr. Jaideep is a very renowned geologist. He has consulted many places around the world. Since learning of SNF's work, he is helping us to find water sources available to people living in remote areas.

Col. Amit Dalavi – He is a retired army Colonel and presently the director of Services Preparatory institute, Aurangabad. Col. Amit Dalavi is looking after skill development in tribal youth.

Ramdas Shinde - A teacher in the tribal areas, Mr. Shinde enjoys social work. Therefore, he joined SNF. He plays an important role in the proper functioning of SNF's educational activities in rural areas and acts as the coordinator of the Peth divisional area.

Adv. Gulab Aher – Adv. Aher is practicing legal counselor and looks after the environment conservation projects.

Er. Prashant Bachhav – After completing Structural engineering from Bits Pilani his next concern was water conservation. So he was attracted to the SNF's work in providing drinking water to the tribal people. Currently, he is handling important part of the technical aspects of SNF's water schemes.

Capt Nilesh Gaikwad – Being the co-founder, Capt Nilesh Gaikwad plays important role in implementation of initiatives of the SNF. He is also a part of the fund raising team.

Dr. Uttam Phartale – Dr. Utam is Medical practitioner in rural area is a co-founder and looks after medical projects of the SNF.

Sandeep Battase - Sandeep, who runs a newspaper distribution agency, has a large following in the tribal areas. Therefore, he helps to our team to convey the issues in tribal area and acts as the coordinator of the Trimbakeshwar division of the SNF.

Vijay Bharsat,

Dr. Nilesh Patil – Mr. Vijay And Dr. Nilesh are working as Surgana Division Coordinators.

Jaideep Gaikwad – He is Dindori Division Coordinator and manages educational aid in rural areas.
